EXPERIENCE

Web Engineer - TFO

Toronto, Canada (Jul. 2024 - Fev. 2026)

- Developed reusable components (React & Typescript)
- Coordinated and updated information across digital platforms using the company's content management tools.(Wordpress, Sitecore, Directus & Louise)
- Managed activities related to content creation (image selection, titles, descriptions, etc.).
- Wrote web content optimized for SEM and SEO.
- Contributed to website content strategies.
- Analyzed website traffic using analytics tools and provide recommendations to improve site performance. (Google analytics, Algolia & Clarity)

Frontend Developer - Inkas

Toronto, Canada (May 2024 - Jul. 2024)

- Designed responsive, visually appealing, and intuitive web mockups. (Adobe XD & Figma)
- Developed websites and web applications for the company's subsidiaries. (ReactJS, Wordpress, HTML, CSS, JavaScript & PHP)
- Ensured design consistency and brand alignment across all web properties.

Frontend Engineer - Vade

Hem, France (Mars 2023 - Janv. 2024)

- Contributed to the creation of the company's design system as the lead developer, based on Figma prototypes provided by the UX/UI team.
- Designed and implemented the architecture of a complete design system.
- Developed design system components. (Vue 3, Tailwind, TypeScript & Storybook)
- Set up CI/CD pipelines to automate testing, deployment, and version releases of the design system on GitLab.
- Documented each component in Supernova to ensure smooth integration and future scalability of the design system.

Frontend Engineer - Leavy

Paris, France (Dec. 2021 - Mars 2023)

- Designed and developed the front-end of the back office for user, property, and payment management. (Figma, Vue, TypeScript & Stripe)
- Developed the client-side interface based on Figma prototypes from the UX/UI team, enabling client registration, apartment description editing, and booking management. (Vue & TypeScript)
- Implemented end-to-end tests (Cypress)
- Collaborated with the backend team to integrate the platform's API.
- Designed and developed email templates (registration, password reset, booking notifications) and integrated them into the application for automated sending. (Figma & Mailjet)
